

Cont. A1
representing any search query which includes a plurality of search conditions; and
an instructing device instructing a full text search based on the
specification information.

B1
3. (Amended) The search system according to claim 1, further
comprising
a generating device automatically generating the plurality of search
condition combinations based on the specification information, wherein
said instructing device instructs a full text search according to the
plurality of search condition combinations generated by said generating device.

4. (Amended) The search system according to claim 1, further
comprising
a changing device changing a portion of search conditions included in
the specification information, wherein said instructing device instructs a selective full text
search for the changed portion.

5. (Amended) A search system, comprising:
an obtaining device obtaining a plurality of search results for a plurality
of search condition combinations in a full text search, each of the combinations representing
any search query which includes a plurality of search conditions; and

Cont
A2

an outputting device collectively outputting output information
corresponding to the plurality of search results.

11. (Amended) A search system, comprising:

an inputting device inputting specification information for collectively
specifying a plurality of search condition combinations, each of the combinations
representing any search query which includes a plurality of search conditions;

A3
B2
a searching device performing a full text search based on the
specification information; and

an outputting device collectively outputting output information
corresponding to a plurality of search results for the plurality of search condition
combinations.

12. (Amended) A computer-readable storage medium on which is
recorded a program for causing a computer to execute a process, said process comprising:

inputting specification information for collectively specifying a plurality
of search condition combinations, each of the combinations representing any search query
which includes a plurality of search conditions; and

instructing a full text search based on the specification information.

13. (Amended) A computer-readable storage medium on which is
recorded a program for causing a computer to execute a process, said process comprising:

obtaining a plurality of search results for a plurality of search condition combinations in a full text search, each of the combinations representing any search query which includes a plurality of search conditions; and

collectively outputting output information corresponding to the plurality of search results.

14. (Amended) A search method, comprising:

collectively specifying a plurality of search condition combinations in a full text search, each of the combinations representing any search query which includes a plurality of search conditions;

performing an information search based on specified information;

obtaining a plurality of search results for the plurality of search condition combinations; and

collectively outputting output information corresponding to the plurality of search results.

15. (Amended) A search system, comprising:

inputting means for inputting specification information for collectively specifying a plurality of search condition combinations, each of the combinations representing any search query which includes a plurality of search conditions; and
